Sub:- Retched Condition of entire Transmission System/Network.

Sir,

It is a matter of great concern that entire transmission system is deteriorating day by day. We understand that it is the administrative lapses and lack of strong will which are responsible for the present situation to meet the growing demand and to provide efficient telecom services to our esteemed customers. In the ever changing Telecom scenario, some comprehensive measures and steps need to be taken. After having indepth discussion and analysis on how to improve present transmission systems, we propose the following comprehensive plan for early implementation.

- i) All BTSs' should be in ring topography.
- ii) Every PCM system should in proper ring topography.
- iii) Immediate restoration of optical fibre route failure specially in Bhatpara, Behala, Jadavpur Divisions etc.
- iv) Air Condition Machine of every BTS terminal should be in working condition.
- v) Staff strength of main PCM nodes to be increased to follow up the surrounding Network as the networks are increasing day by day.
- vi) To upgrade the recent development PCM system/Opt. Fibre N/W periodical workshop/training programme should be conducted by experts/company people for all technical officials and officers.
- vii) FRS system(MLLN N/W) should strictly to be maintained.
- viii) Every PCM terminal should be equipped with measuring equipment so that terminal can be handled the problem independently.

We hope that the package will be able to provide uninterrupted telecom service.

We would therefore request your goodself to kindly understand the gravity of the situation and bestow personal attention for speedy action.

Thanking You,

Sincerely Yours,

(ATANU MONDAL)
